MIHIR SIDHDHAPURA

Full Stack Developer | Node.js · NestJS · React · Next.js · AWS

Surat, Gujarat, India +91 97232 34237 mihirsidhdhapura41@gmail.com linkedin.com/in/mihir-sidhdhapura-40661b2b2

PROFESSIONAL SUMMARY

Full Stack Developer with **4+ years** of experience building scalable, production-grade web platforms with **Node.js, NestJS, TypeScript, React, Next.js, MongoDB, PostgreSQL and AWS**. Strong backend foundation in REST/GraphQL APIs, microservices and event-driven architecture (Lambda, SQS, SNS), with hands-on frontend delivery in React and Redux. Led a **1M+ customer-record migration** for a major Australian retailer, cut MongoDB query times by **~60%**, and led a team of 5–6 developers on a B2B marketplace built from scratch. Experienced working remotely with global clients across e-commerce, healthcare and B2B domains.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Backend	Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices, Socket.IO (WebSockets), Swagger/OpenAPI
Frontend	React, Next.js, Redux Toolkit, Angular, Responsive UI, Data Visualization
Databases	MongoDB, PostgreSQL, Redis (caching), Query & Index Optimization
Cloud & DevOps	AWS (EC2, Lambda, SQS, SNS, IAM, CloudWatch), Docker, NGINX, CI/CD, GitHub Actions
Auth & Messaging	JWT, OAuth 2.0, RBAC, RabbitMQ, Event-Driven Architecture
Platforms & Tools	CommerceTools, Fitbit API, Git, GitHub, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer — ITCode Infotech | Surat, India **Jun 2025 – Present**

Rehired after prior tenure (2022–2023)

- Own end-to-end feature delivery across client projects — from database design and NestJS/Node.js APIs to React/Next.js user interfaces.
- Build responsive, reusable React components with Redux Toolkit and integrate them with secure, versioned REST and GraphQL APIs.
- Design schemas and optimize queries in MongoDB and PostgreSQL; apply Redis caching for high-traffic endpoints.
- Containerize services with Docker and ship through CI/CD pipelines (GitHub Actions) to AWS.
- Mentor junior developers, run code reviews, and translate client requirements into technical specifications and estimates.

Backend Developer — Overdose | Australia (Remote) **Feb 2024 – May 2025**

Client: Officeworks (major Australian retailer) · NestJS, TypeScript, AWS, CommerceTools, Docker

- Led migration of **1M+ customer records** — with addresses, organizations and branch data — from IBM WebSphere Commerce to CommerceTools with full data integrity and **zero downtime**.
- Designed and built scalable REST APIs in NestJS for enterprise e-commerce, integrating CommerceTools for product catalog, pricing and order management.
- Built event-driven microservices on AWS Lambda, SQS and SNS for asynchronous processing and serverless workflows.
- Refactored legacy logic and improved API performance by **30%**; monitored services with AWS CloudWatch.
- Implemented secure authentication and authorization using AWS IAM.
- Partnered with product managers and stakeholders on requirements; delivered regular demos to internal teams and the client.

MERN Stack Developer — SmartData | Punjab, India (Remote) **Apr 2023 – Feb 2024**

Project: BioHacker (health-tracking platform) · Node.js, React, Redux Toolkit, Fitbit API

- Owned the backend for BioHacker: designed and built secure, scalable REST APIs consumed by the mobile app team, from architecture through delivery.
- Built the full admin panel in React + Redux Toolkit to manage users, health insights, analytics and connected-device data with interactive visualizations.
- Integrated wearable health-tracking data (Fitbit API) to sync activity, sleep and vitals in real time for users and healthcare professionals.
- Collaborated closely with mobile and web teams to define API contracts and ensure smooth cross-platform releases.
- Implemented data-privacy and user-consent flows for sensitive health data.

Backend Developer (Intern → Full-time) — ITCode Infotech | Surat, India **Mar 2022 – Apr 2023**

Node.js, Express.js, MongoDB, Redis, Docker, AWS EC2, Socket.IO

- Converted from intern to full-time Backend Developer; designed RESTful APIs from scratch with Node.js and Express.
- Reduced MongoDB query time by **~60%** through index optimization and improved API response times with Redis caching.
- Deployed containerized services on AWS EC2 with Docker; built a real-time chat system with Socket.IO integrated into a React frontend.
- Ran regular code reviews and refactored legacy modules for maintainability and performance.

KEY PROJECTS

BioHacker – Health-Tracking Platform | SmartData · Node.js, React, Redux Toolkit, MongoDB, Fitbit API

- Built the complete API layer powering the mobile app, plus the web admin panel for managing users, health insights and device data.
- Integrated wearable health-tracking data from Fitbit for real-time sync, with privacy and consent flows for sensitive health data.

OTM – B2B Marketplace | ITCode · Express.js, MongoDB, Angular, Docker, AWS, Socket.IO

- **Led a team of 5–6 developers** to build a complete B2B marketplace from scratch: user management, product catalog, orders and payments.
- Added real-time chat with Socket.IO; deployed with Docker and set up CI/CD pipelines for faster releases.
- Worked with product owners to convert business needs into technical specifications; enforced coding standards through reviews.

Healify – Healthcare Appointment Platform | ITCode · Node.js, MongoDB, React

- Designed a modular backend and admin panel to manage patients, doctors and appointment schedules.
- Implemented role-based access control (RBAC), real-time notifications and HIPAA-aligned security practices for patient data.

EDUCATION

B.E., Computer Science & Engineering — Government Engineering College, Patan | CGPA 8.13/10 **2018 – 2022**
